

Thread Communication

Thread sleep()

synchronized {}

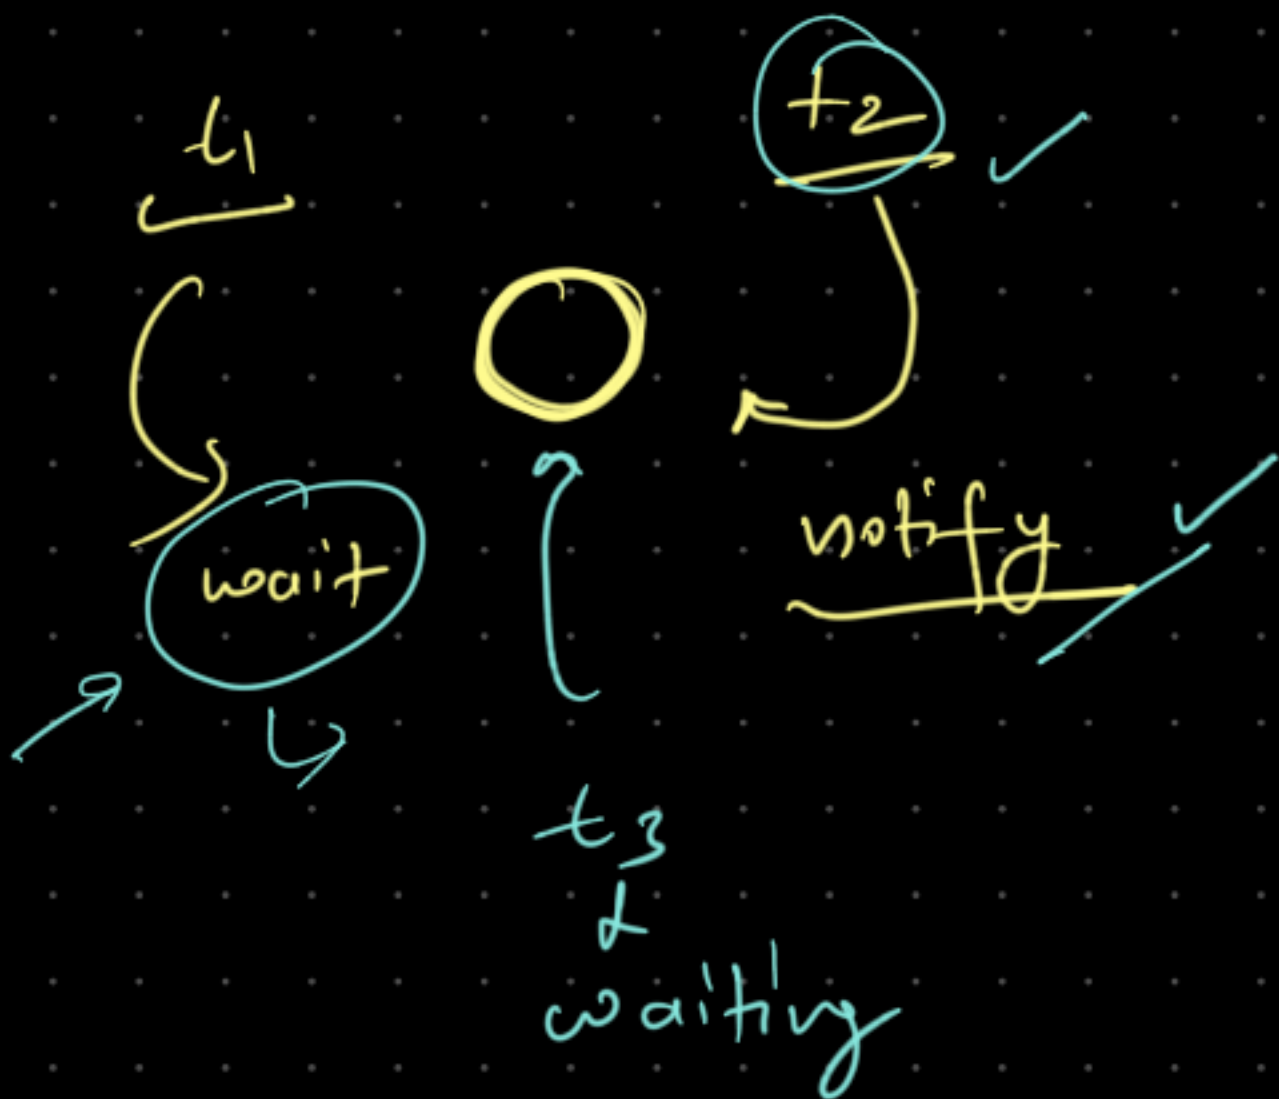

(→)

}

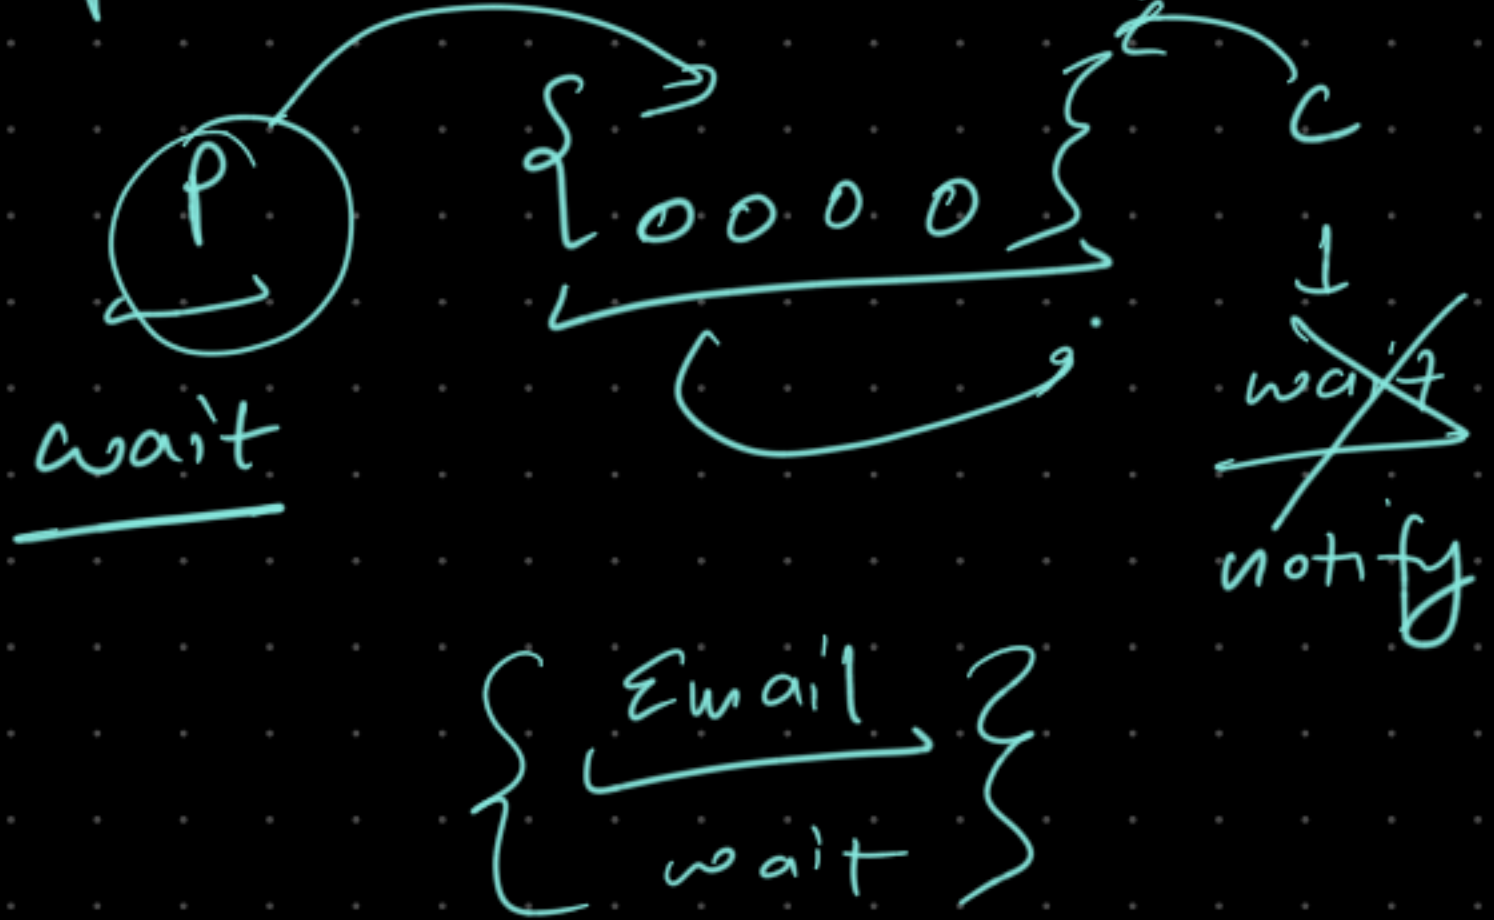

wait()

notify()

notifyAll()

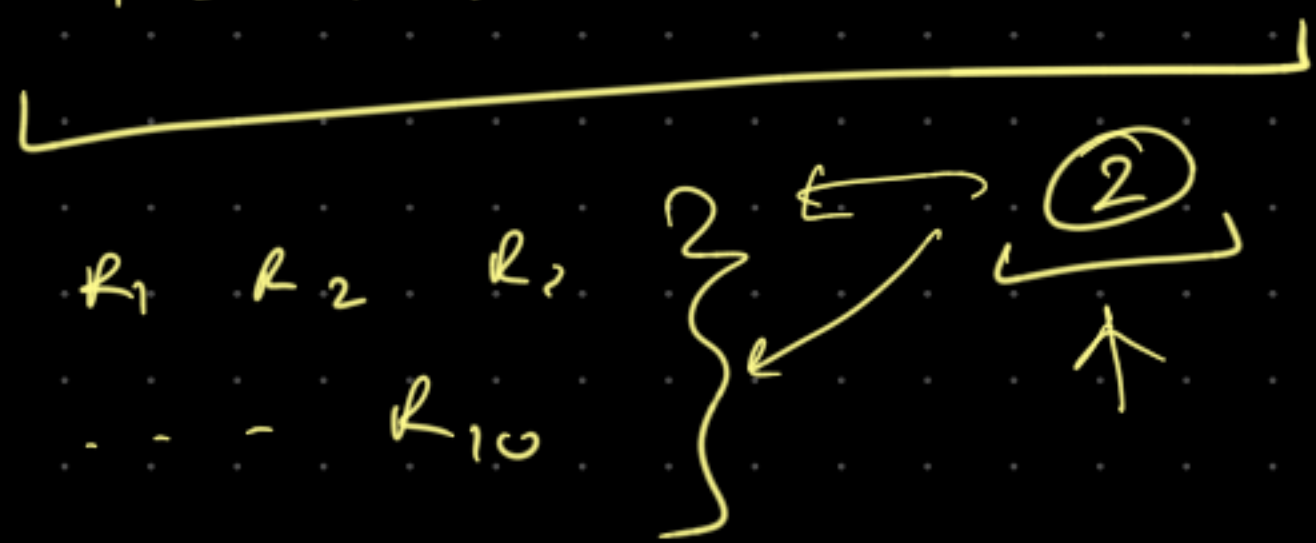

producer consumer problem

task-1 → t_1

task-2 → t_2

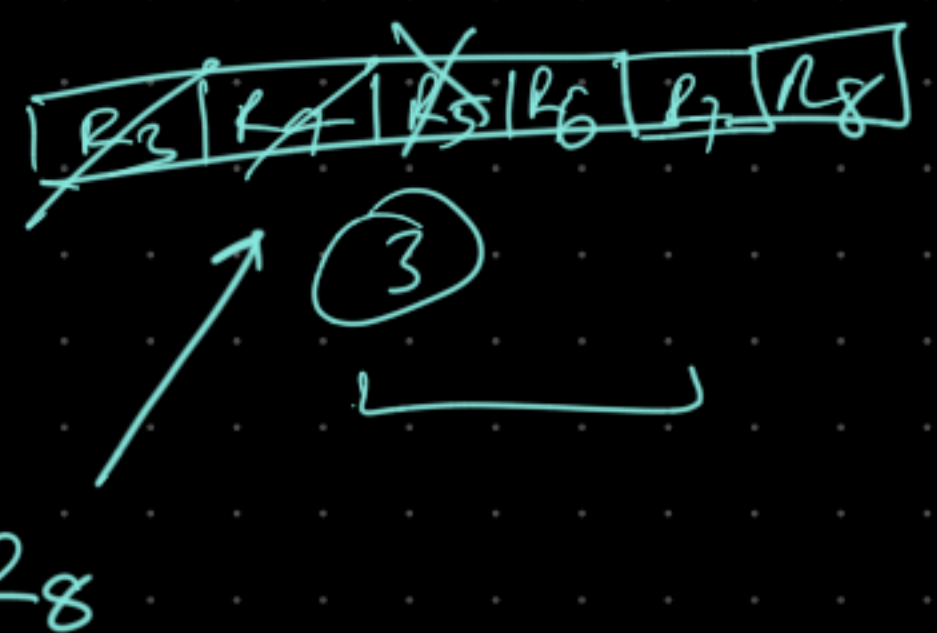

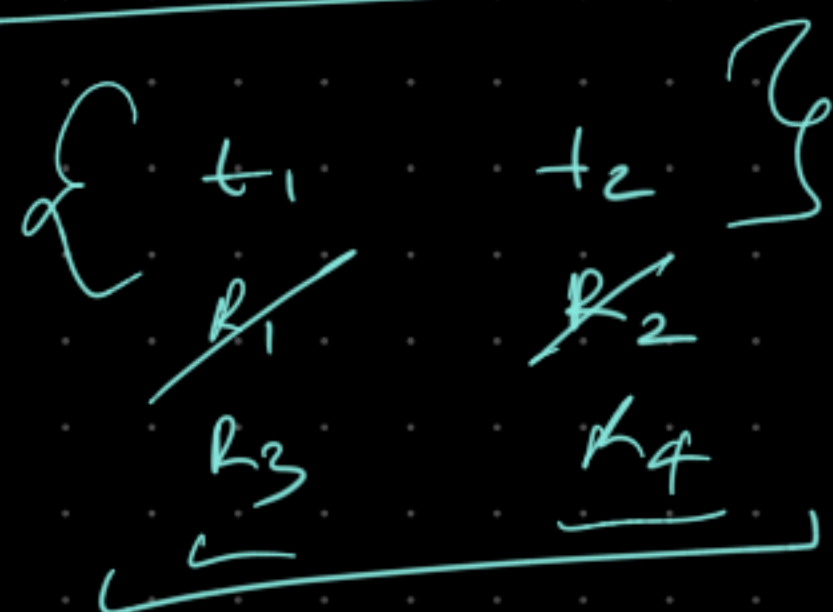

2 tasks will Concurr

& wait

- ✓ min no of threads
- ✓ max no of threads
- ✓ queue

$R_1 \rightarrow R_{10}$

Runnable Interface

run → return void

Callable

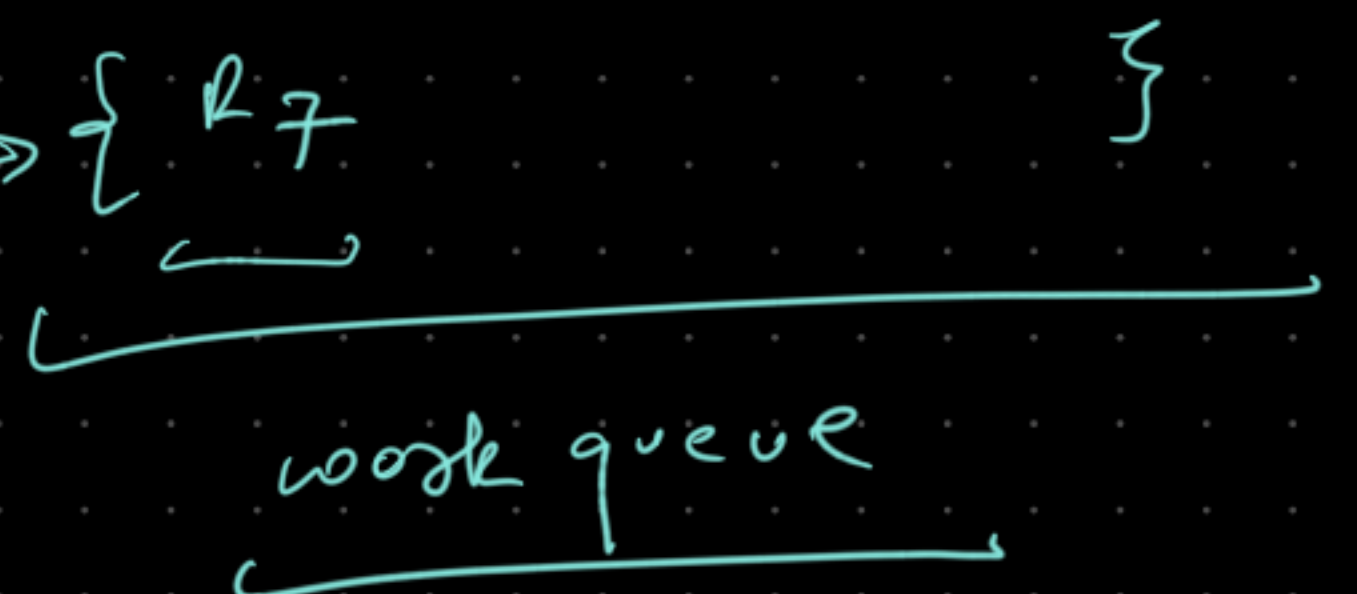

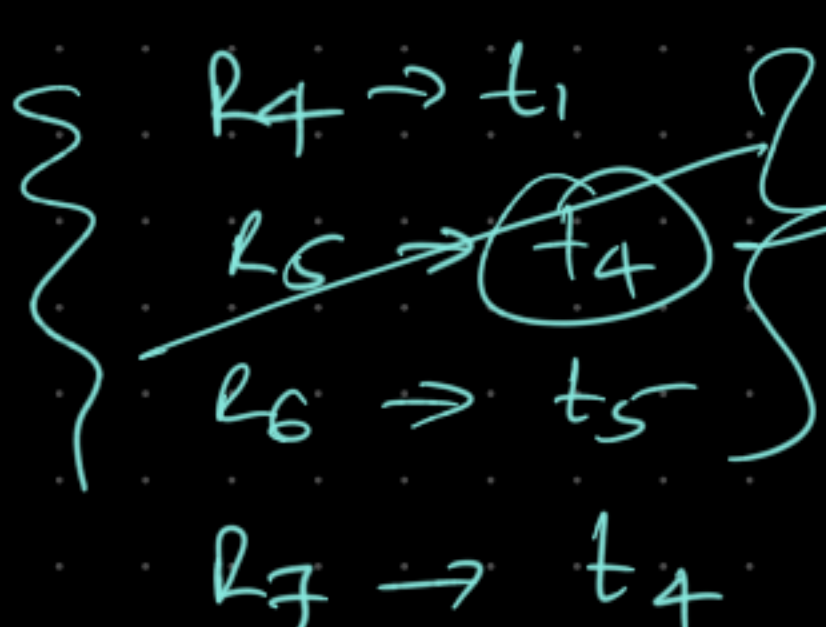

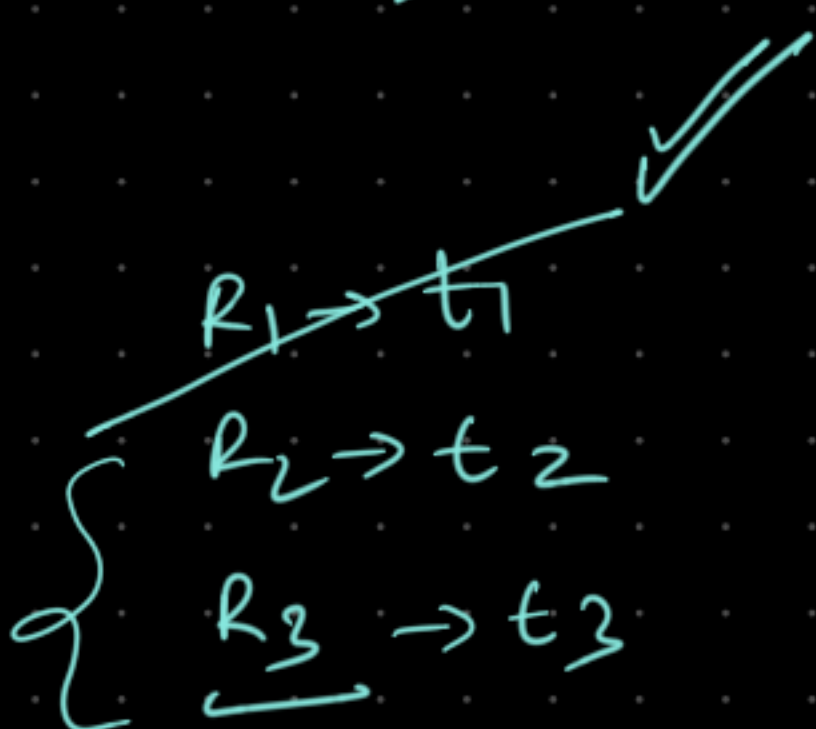

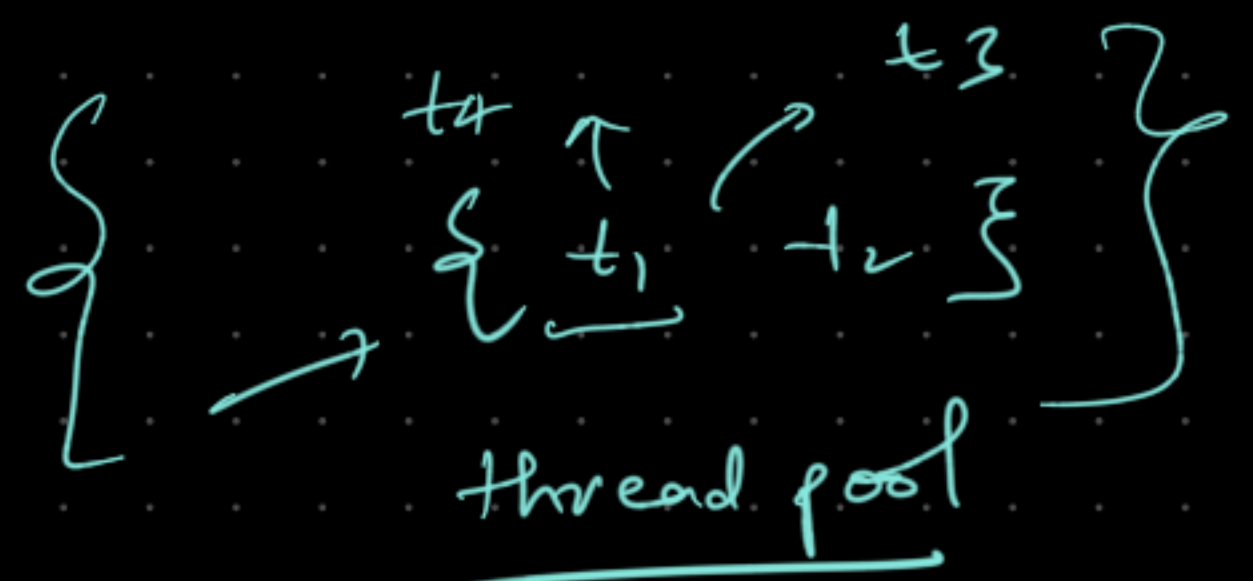

call() → return type

min → 2

core pool size

max → 5

max pool size

work queue

2 5
