

Class-3

↳ Debugging using the ide: →

↳ IntelliJ

↳ 3 major things

1. execute a line ✓
2. go inside a function ✓
3. execute entire func and get out of it ✓

Debug →

- 1) Identify the entry point
- 2) put a break-point there
- 3) Don't Run the App, start the App in Debug mode
- 4) your B.P. should hit
- 5) use the 3 buttons to move around

Classes

```
class A {  
    f1()  
    f2()  
    f3()  
}
```

Main() {

```
    class A C;  
    C.f2() → NPE
```

```
    int a; → 0  
    String a; → null  
    char a; → null
```

```
class A C1; X  
class A C1 = new class A C();
```

↳ [an object of class A]

```
class Student {  
    String name;
```

```
    giveIntroduction();  
}
```

```
student s1 = new Student(); ✓
```

```
" s2 = new Student();
```

```
s1.giveIntroduction();
```

```
student s3 = s1
```

```
int  
├── int a  
│   └── 5  
└── int b  
    └── 10
```

```
stack } Heap  
s1 → [ ] ✓  
s2 → [ ]  
s3 → [ ]  
objects in Heap
