Rate limiting ?

500K

1 person 500K

500K hitting 1 req

Rate limit them

500K 200K

20 → 30 → (X)

1 sec → 10 req → Person A

H L D

Functional Req

↳ on what basis, should I rate limit them

↳ how identify → API-key, I.P, user-id

- limit req's → Rules →

hashmap ⇒ user.id → hashmap, set

u123, t1 t2 t3 t4

(X) t4

limit

B.E

(X) 429 ↳ too many reqs

Respond with proper msgs → 429

rate limiter

↳ new rule

Non functional :→

CAP → Consistency ✓ Availability ✓

+ eventual consistency

Scalability

Latency

B→ calls → 2 sec

client → B.E

rate limit checks lightening fast

10 ms → Redis

Scale :→ 100 M DAU ⇒ 1M → qps
